# CHRIS MUZZIN

San Diego, CA | (469) 682-1710 | chrismuzzin1020@gmail.com | GitHub | Website | LinkedIn

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, HTML5, CSS3, SCSS, Python
**Frameworks & Libraries:** Angular, React, React Native, Next.js, Ionic, Redux, NgRx, RxJS, Flux
**UI & Design Systems:** ag-Grid Enterprise, PrimeNG, Material UI, Tailwind, Bootstrap, Bulma, D3, Chart.js, Mockups/Prototyping
**Architecture:** Nx Monorepos, Standalone Components, Component Store, Lazy Loading, REST APIs, Map Layer APIs, Design Systems
**Cloud & Tooling:** AWS (S3, API), Node.js, Express, Firebase, Postgres, Webpack, Git, Azure DevOps, Jira, Bitbucket, Google Analytics/Tag Manager
**Testing & Quality:** Jest, Angular Testing Suite, CI/CD, SonarQube, Checkmarx, Blackduck
**Methodologies:** SAFe Agile, Scrum, Technical Leadership, Mentorship, Sprint Planning, Code Reviews
**AI:** Claude Code, Claude Sonnet

## PROFESSIONAL EXPERIENCE

**FICO INC.** | San Diego, CA *Nov 2024 – Jul 2026*
**Lead UI Engineer**

- Lead frontend engineer for Analytics Workbench (AW), FICO's enterprise platform used by data scientists to build, compare, deploy, and monitor predictive models.
- Led UI architecture for enterprise Angular apps using Nx, NgRx, RxJS, standalone components, lazy loading, and AWS.
- Delivered one of the largest, most technically complex features in AW history: **Analyses Factory (Score Comparison Analysis)**.
- Led Angular modernization across the monorepo, upgrading ag-Grid Enterprise, the internal IRIS design system, and npm dependencies; eliminated all high-severity CVEs while reducing dependency overrides.
- Built analytics dashboards with ag-Grid Enterprise, D3, and Chart.js, plus async workflows on AWS S3 and REST APIs.
- Raised code quality through SonarQube, Blackduck, and Checkmarx remediation, code reviews, and Angular best practices.

**BAE SYSTEMS INC.** | San Diego, CA *Jan 2019 – Apr 2024*
**Software Engineer II**

- Core frontend engineer for the Geospatial Exploitation Platform (GXP), building scalable UIs, components, and map layer integrations with React and Material UI.
- Maintained Node.js middleware, proxy servers, and REST API integrations bridging frontend clients and backend data streams.
- Built comprehensive Jest unit test suites ensuring delivery quality for high-consequence enterprise clients.
- Ran sprints in Azure DevOps, led daily stand-ups and sprint planning, oversaw PR reviews, and mentored new engineering hires.

**DILLARD'S INC.** | Little Rock, AR *Jan 2016 – Dec 2018*
**UX Front End Developer**

- Architected Angular SPAs for Store Planning, Marketing/Advertising, and the Photo Studio, and led legacy migrations from jQuery to Angular.
- Built an in-house job posting engine and feeder app for the careers platform, eliminating third-party dependency.
- Built a cross-platform Ionic mobile app for the photo studio, phasing out legacy hardware scanner guns.
- Designed UI mockups and prototypes in Balsamiq; integrated REST APIs and wrote unit tests with Angular's testing suite.

## PROJECTS

**ROAST MY COFFEE HOUSE** (iOS, Web, Android) *Cofounder & Tech Lead*

- Led architecture, development, and performance optimization for a hybrid cross-platform Ionic/Angular app; implemented Firebase auth, Firestore, hosting, and cloud functions for local coffee roaster discovery and reviews.

**RUNE TOOLS** (rune-tools.com) *Creator*

- Designed and built an Old School RuneScape lookup app in Angular and TypeScript, integrating external game data APIs into a fast, responsive search experience with reusable components.

## EDUCATION, CERTIFICATIONS & COMMUNITY

**BS, Computer Science** — University of Arkansas, School of Engineering *Fayetteville, AR*

- Top Secret / SCI Security Clearance | SAFe Agile Certification | Leading Agile – Scrum Master Training
- Angular Architecture & RxJS Workshops (Angular Mix) | Data Structures & Algorithms in Python Bootcamp (Udemy)
- Programming Department Volunteer, Comic-Con International, San Diego
